

Flea Pre-Treatment Check List

Name: _____

Address: _____

Date: _____

Preparations For Inside Flea Treatment

1. Vacuum all carpeted areas and upholstered furniture and dispose of the vacuum bag outside and away from home.
2. Remove all items from the floor including your closets.
3. Sweep and mop all non-carpeted areas.
4. Clean or dispose of all pet bedding.
5. Cover and turn off all fish tanks and remove all other pets from your home and return 4-6 hours after treatment.
6. On the day of your scheduled flea treatment, take your pet to the vet and treat for fleas.
7. After treatment, be ready to stay away from home for about 4-6 hrs.
8. Vacuum your carpets every other day for the next 30 days after the treatment was completed.
(Place an activated flea collar in the vacuum bag or throw away bag after each use).

Preparations For Outside Flea Treatment

1. Mow your lawn and bag clippings before the scheduled flea treatment.
2. Remove all pet feeding and water bowls.
3. Wash and dispose your pet's entire exterior bedding materials.
4. If applicable, turn off lawn sprinklers for at least 24-48 hours after scheduled flea treatment.

Important: *If any of the above steps are not completed, it is very likely that the treatment will not be effective and void any warranty, if offered. A follow treatment may be necessary.*
